HD mic with arm that rotates 270°

Passive noise canceling cushion

Plug and play

In-line control capsule

## Clear conversations for enhanced productivity

Clear communications are currently vital for your team to achieve the best results. Be more productive with the KlearCom headset, designed for daily use, and a seamless plug and play connection through a USB port to join conference calls on the most popular unified communications platforms (UC). Finish a whole day of calls without discomfort around the head and ears with the padded leatherette ear cups and the adjustable padded headband that don't exert too much pressure; in addition, they are so light that you won't even feel them. Leverage the in-line control capsule to easily manage your calls by muting the microphone at the right moment, canceling the headphone audio when you need to listen to your surroundings, or just modifying the volume. The KlearCom headset is essential to support you in the most relevant challenges of your day.

### Highlights

- Stereo headset solution with in-line control capsule to easily handle all your calls
- Compatible with Teams, Zoom, Skype, and other leading unified communications (UC) platforms<sup>1</sup>
- Outstanding audio quality enables clear communications on both ends of the call
- Adjustable microphone arm can rotate up to 270 degrees to place it on either side of your head
- Leatherette ear cushions provide a soft sensation and all-day comfort
- Padded metallic headband provides comfort and durability
- Lightweight and unobtrusive design, for greater productivity and concentration

<sup>1</sup> Some limitations in platforms' functions may apply depending on the UC platform to be used.
