The perfect symbiosis of style, functionality and performance that makes your desktop module whole

Complement your desktop kit with the elegant and practical keyboard and mouse duo KeyRoll by Klip Xtreme, where the flexibility and mobility of wireless connection perfectly coalesce with the versatility and the advanced features of the latest technology. An ultra-compact 2.4 GHz dongle ensures seamless connectivity between keyboard and mouse, virtually immune to interference and lag, thus allowing the perfect synchronization between your mind and your fingers. The 12 multimedia keys included on the keyboard offer you direct access to frequently used functions, folders, and applications, increasing your workflow to get the most out of every second. The slim, compact design optimizes space on your desk, the keys are soft to the touch for smoother, faster, and more precise typing, and the fold-out rear legs give you a perfect tilt, topped by the comfort and relief offered by the integrated hand rest.

For its part, the mouse glides smoothly on virtually any surface and is equipped with a high-definition optical sensor for fluid and precise cursor movement. Now you just have to plug in the USB dongle and you are ready to start writing and browsing.

Highlights

- Keyboard with hand rest for added comfort and fatigue relief, and fold-out rear legs to achieve the ideal tilt.
- 12 multimedia keys for direct access to key functions and applications.*
- 3-button wireless mouse with 1200dpi resolution
- Slim design saves desktop space
- Soft-touch rectangular keys for greater typing accuracy and speed
