

Projection screen

Motorized unit

Project your vision, bring your ideas to life

This rugged projection screen combines precision, style and convenience. Equipped with a reliable electric rewind mechanism, this screen offers variable height settings plus the convenience of controlling the unit using the controller wall switch or the wireless remote. Featuring a white matte finish, the screen eliminates both glare and reflections. The unit may be mounted on the wall or on the ceiling. Available with white case.

Highlights

- White matte and black frame surface
- Flame retardant and seamless fabric
- Electric motor ensures safe and smooth operation
- Dual wall and ceiling installation design
- Features a controller switch and wireless remote to control your screen from anywhere in the room
- Wide-screen ensures increased visibility and image clarity from every angle
- Ideal for home theater applications and business presentations
