WARNING: Laser radiation. Do not stare into the beam or view directly with optical instruments. Class III A laser product. Never point a laser beam into a person's eyes or view a laser beam directly. As prolonged exposure can be hazardous to the eyes, momentary exposure from a laser pointer, such as an inadvertent sweep of the light across a person's eyes, may cause temporary flash blindness similar to the effect of a camera flash bulb. Although this condition is temporary, it can become more dangerous if the exposed person is engaged in a vision-critical activity such as driving.
